

SafeByte

Cybersecurity Services. Smarter. Better.

CYBER SECURITY IS OUR WAY

Our experienced staff of engineers provide you with best-in-class penetration testing services, whether you are a Top500 or a start-up Company.

Our mission is to Keep Things Simple for you. Protect you from cyber threats while you focus on your business.

[Security]

We protect you by finding the vulnerabilities before they will be used against you by malicious actors. We provide tailored services, adapted to your needs that will confer a stronger security posture for your organization.

[Trust]

We believe in mutual trust and your data is safe with us. We are highly experienced professionals and being trustworthy is one of our top priorities. We can help you keep your data private and be aligned with privacy laws and regulations.

[Industry Certified]

Our experienced staff of engineers hold various industry recognized certifications as an additional assurance of professional services that you will get. OSCP, OSWP, CEH, LPT, CISSP, GICSP, GRID, CSSA are among our certifications.

Complete Penetration Testing Services

We are continuously adapting our Penetration Testing services to meet Today's modern technologies, personal devices, IoT and embedded systems, cloud platforms and even smart hardware.

- Web Applications Penetration Testing
- Mobile Penetration Testing
- Infrastructure Penetration Testing
- Wi-Fi Penetration Testing
- Cloud Infrastructure Penetration Testing
- Hardware Penetration Testing
- RedTeam Penetration Testing
- ICS/SCADA Penetration Testing

Cloud Infrastructure Penetration Testing

Is your data safe in the Cloud? The Cloud security features have been correctly configured? We are here to determine it for you.

RedTeam Penetration Testing

This offensive, goal-based and real-life scenario service will test your countermeasures, your reaction and resilience to complex cyber attacks

ICS/SCADA Penetration Testing

One of our most specialized service that will help you secure the mission critical ICS/SCADA systems, networks and infrastructures.

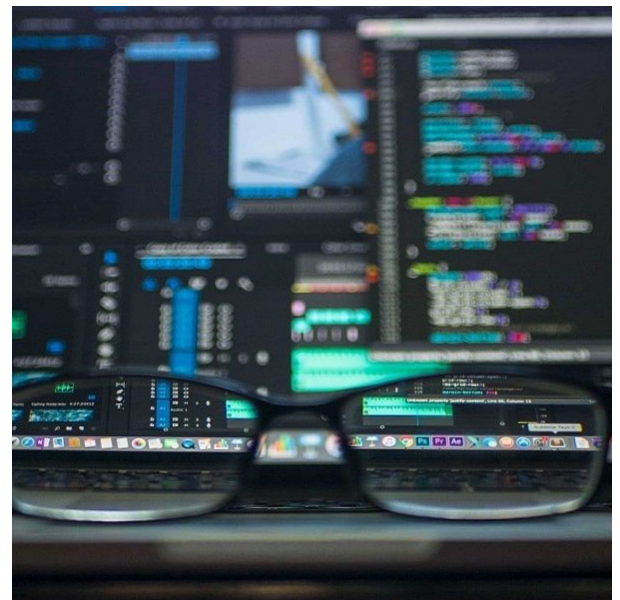

Hardware Penetration Testing

We are ready to test embedded devices, black-boxes, firmware, undocumented communication protocols and physical resilience.

Check our Services section on the web site for a complete services list and detailed description.

Penetration Testing - The Benefits

- ◆ Identify vulnerabilities you didn't know existed
- ◆ Identify real risks
- ◆ Implement security controls efficiently
- ◆ Test your team's response capabilities
- ◆ Find out how vulnerable you are on cyber attacks
- ◆ Build trust with your customers
- ◆ Comply with regulations and certifications
- ◆ Avoid system downtime
- ◆ Protect your business and brand

Advanced Security Services

Every organization is a living body and we know that businesses are different therefore the need for cybersecurity most often should be tailored and built up as a custom puzzle that glues and secures all elements – people, processes and technology – together. We help our clients to continually improve cyber security maturity level by providing advanced security services, custom made, to respond on custom needs. SafeByte Consulting offers to it's customers decades of experience on cyber security, making complex security projects simple and assist you on every step to fulfill your security plan implementation.

Talk with our experts

Consult an Expert

- Identify and architect the right security solutions and products that fit your needs
- Evaluate security products and solutions
- Design and verify security requirements in your IT projects
- Quality assurance monitoring on security solutions

Incident Response

- prepare (for), detect, contain and recover from a cybersecurity breach
- Identify the root cause of the breach
- Have a real impact analysis of the incident
- Post-incident recovery
- Design effective countermeasures

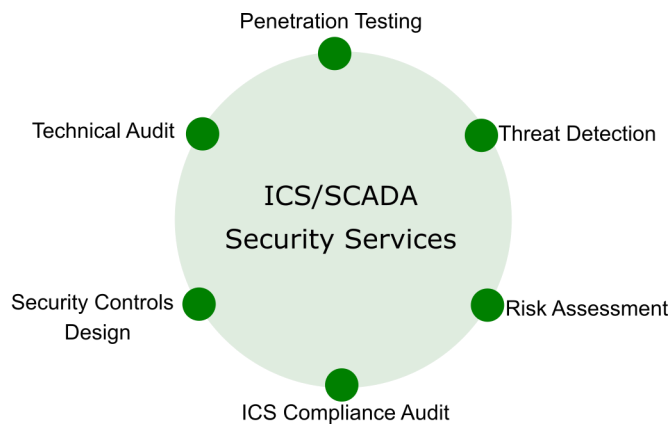

Threat Hunting

- Detect stealth threats inside your organization
- Have Think-like-a-Hacker experts hunt malicious activities that threaten your business
- Improve your procedures and train your staff
- Monitor data breaches

ICS/SCADA Security Services

Our ICS security experts have great experience in assessing various ICS infrastructures, from water distribution to manufacturing and energy. Based on our practical experience and the needs that we observed during interactions with critical infrastructures, we have developed a broad range of security services.

In the field of prevention of cyber attacks on Critical Infrastructures, penetration tests and security audits have a key role to play, as a means of timely verification and detection of both procedural and technical vulnerabilities, in order to reduce the risk of attacks by improving the security

What Recommends Us?

SafeByte Consulting was founded by a core of seasoned professionals in the domain of cybersecurity and information technology having the goal of providing complex security services to organizations of all sizes and domains of activity

At SafeByte we believe in hard work driven by passion, with respect for customer's needs.

Experience

We gained our expertise in complex security projects, doing research, learning and teaching. From Retail to National Defense sectors, from charity projects to ICS/SCADA, we have been present in an evolving market for more than 15 years.

Passion For Security

We love our work! We are continuously learning and gain knowledge as new technologies emerge. We take every project with the passion of providing every customer with excellent quality.

We Understand Business

No matter what industry you are in, we know you are proud of your business. You want to keep it secure, you want to keep it safe, you want to grow it. We are not just technical experienced, we will get you cybersecurity shaped-in for your business.

We are proud to be certified in various fields of cyber security

- **C|EH** – Certified Ethical Hacker (EC-COUNCIL)
- **LPT** – Licensed Penetration Tester (EC-COUNCIL)
- **OSCP** – Offensive Security Certified Professional (Offensive Security)
- **OSWP** – Offensive Security Wireless Professional (Offensive Security)
- **GRID** – GIAC Response and Industrial Defense (GIAC)
- **GISCP** – Global Industrial Cyber Security Professional (GIAC)
- **CSSA** – Certified Scada Security Architect (IACRB)
- **CHFI** – Computer Hacker Forensic Investigator (EC-COUNCIL)
- **ECSA** – EC Council Certified Security Analyst (EC-COUNCIL)
- **CISSP** – Certified Information Systems Security Professional (ISC2)
- **Pentest+** CompTIA
- **Security+** CompTIA
